Prime Areas Personal, Social and Emotional Development Communication and Language Physical Development	These core subjects are crucial for all areas of learning. They are paramount for attainment in our other 4 areas of learning in our curriculum. These are sometimes taught or focused on as whole class learning but more often are explored through play, our high-quality learning environments, and skilled teacher interactions in order to help each child take the next steps in their learning. Interventions in these areas may be put into place to assist children who may need additional support in these areas of learning.
